## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Silverbrook (US 2005/0099454).

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention “by another,” or by an appropriate showing under 37 CFR 1.131.

***Silverbrook teaches an inkjet printer comprising:***

**Claims 1, 3, 4:**

- a cradle (figure 14, cradle 71)
- an inkjet printer cartridge releasably engaged by the cradle (figure 14, cartridge 80, cradle 71) including at least first and second storage reservoirs

for storing an ink and an ink fixative respectively (paragraph 175), a pagewidth head in fluid communication with the first and second fluid reservoirs (figure 16, pagewidth head 81), and a controller (paragraph 174 teaches control electronics 72) to control application on the ink and ink fixative by the printhead in order to facilitate fixing of the ink onto a print media following delivery by said printhead (paragraph 175 teaches fixative used to set ink)

**Claim 2:**

- cartridge further includes further storage reservoirs to separately store a set of colored inks sufficient for color printing (paragraph 175 teaches 6 separate reservoirs of color inks)

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Lamson D. Nguyen whose telephone number is 571-272-2259. The examiner can normally be reached on 8-5.
